

freedom

could the quarks have known  
choosing to share energy  
would lead to the long chain polymers  
finding their way into Life  
eukaryotes the miracle altruism  
freedom Love unveil

freedom turned words language narratives  
what notion more contested / yet unchained  
reality more wished for  
theme more common

*to pursue the trajectory authenticity suggests*  
beyond the self-as-separate imaginary

time / history / microtheatres  
we've been passed a world  
caught up in a destructive master narrative  
rife with conflict / suffering / planetary criticality  
tyrannies / oligarchy / an uncertain direction  
democracy at the edge of our mind

a thousand years / the blink of an eye  
everywhere signs of what freedom can do  
can dissolve hatred / overcome prejudice / transcend competition  
deliver roots / connection / meaning / purpose  
freedom represents the power to change  
change what we think of one another / ourselves / what we do  
freedom speaks to who we are
