

Love

imperfectly as we understand
matter began with strings creating harmony
Life with polymers acting to benefit others
nucleated cells with the sacrifice of former identities
affinity draws us close / makes bonds
wants to see again / be with
Love holds the Universe together

for some Love has no words
others just four letters
some say Love's a force / others a Garden
even that *Love is all there is*
in its throes or a moments bliss
eternity

Love waits
in the shadows pathways cross
the choices we make
beneath baby's breath / smiles / tears
back of our mind
for a touch of hand

Love wills unity
dialogue engagement commitment fidelity
inspired / entangled / unpredictable
Love does things never tried
forgives mistakes / pardons hurt / absolves debt
feeds shelters comforts encourages heals
Love altruistic brings happiness

Love has no measure
Buddhism maps the ways of Love / for Judaism Love is Covenantal
Christianity says God is Love / Islam Allah filled with Love
given Love overcomes every obstacle
makes sense we think Love divine
without excuse with Love
we could save the world together
