

air

borderless streams swirling vortices  
draw us together  
bear our voices / every tear  
carry the music  
our hearts can't do without

molecules mixed with microbes  
dust pollen particles vapor  
shelter Earth  
bend light / wed the dark  
breathe the fish / animals / plants

dream commune  
eyes have seen you  
wearing the rain  
befriending thunder  
soft as the larks ascent

mountain clear  
gulf breeze cool  
petal fragrant spirit of heaven  
has the story a happy ending  
do we hold each other's hand
