About your Stars, you probably know,
Shades of autumn, friendship's glow –
The Moon certain a rosebud heart,
Venus vows to help with the part.

Learned from the wind to improvise,
Upturn expectation, effect surprise –
Intuitive minded, student of history,
A hyperspatial complex Mystery.

Gray clouds tumult the whole of the sky,
Hope is hearing your answer why –
In view of your Loving Planetary vision,
Galactic pulse / community mission.

Beneath the lines, newsfeeds, threads,
The criterion for establishing truth embeds –
Justice, Peace, the World thought possible,
With your satin touch, becomes probable.
